

Eradra™

Lifitegrast 5%
Sterile Eye Drops

Presentation

Eradra™: Each ml sterile eye drops contains Lifitegrast INN 50 mg.

Preservative: Sodium Perborate 0.01%

Pharmacology

Lifitegrast is lymphocyte function-associated antigen-1 (LFA-1) antagonist. Lifitegrast binds to the integrin lymphocyte function-associated antigen-1 (LFA-1) and blocks the interaction of LFA-1 with its cognate ligand intercellular adhesion molecule-1 (ICAM-1). LFA-1/ICAM-1 interaction contributes to the formation of an immunological synapse resulting in T-cell activation and migration to target tissues. Lifitegrast inhibits T-cell adhesion to ICAM-1 in a human T-cell line and inhibits secretion of inflammatory cytokines.

Indications

Eradra™ (Lifitegrast 5%) is indicated for the treatment of the signs and symptoms of dry eye disease (DED).

Dosage and Application

Instill one drop of Eradra™ twice daily (approximately 12 hours apart) into each eye.

Contact lenses should be removed prior to the administration of Eradra™ and may be reinserted 15 minutes following administration.

Contraindications

Patients who are hypersensitive to this drug or to any ingredient in the formulation or component of the container.

Precautions

Do not touch the dropper tip to surfaces since this may contaminate the solution. After one month of the opening do not use the medicine of dropper.

Adverse Effects

The common adverse effects are instillation site irritation, dysgeusia and reduced visual acuity. Less common are blurred vision, conjunctival hyperemia, headache, increased lacrimation, eye discharge, eye discomfort, eye pruritus and sinusitis.

Use in Specific Population

Pregnancy & Lactation: There are no available data on Lifitegrast use in pregnant women to inform any drug associated risks. There are no data on the presence of Lifitegrast in human milk, the effects on the breastfed infant or the effects on milk production.

Pediatric Use: Safety and efficacy in pediatric patients below the age of 17 years have not been established.

Geriatric Use: No overall differences in safety or effectiveness have been observed between elderly and younger adult patients.

Overdose

There is no information regarding overdose in patients taking Lifitegrast. For management of a suspected drug overdose, contact your ophthalmologist.

Storage Conditions

Store in a cool (below 30°C) and dry place, away from light. Keep out of the reach of children.

Commercial Pack

Eradra™: Each plastic dropper bottle contains 5 ml sterile eye drops.
