

# Alzed

Albendazole 400 mg Tablet

**Presentation:**

Each chewable tablet contains Albendazole USP 400 mg.

**Description:**

Alzed is a broad spectrum oral anthelmintic. It blocks glucose uptake by larval and adult stages of susceptible parasites, depletes their glycogen storage and decrease formation of ATP. As a result the parasite is immobilized and dies. Alzed has been found to have both ovicidal and larvicidal properties in man.

**Indications:**

Alzed is indicated for pinworm infection, ascariasis, trichiuriasis, strongyloides and infections with both hookworm and pinworm species. Albendazole is also the drug of choice in hydatid disease and cysticercosis.

**Dosage & Administration:**

*Adults and children over 2 years of age:* 400 mg (a single tablet) as a single dose in cases of *Enterobius vermicularis*, trichiuriasis, ascariasis, hookworm and pinworm infections. The tablet may be chewed, swallowed or crushed and mixed with food. No specific procedures such as fasting or purging are required.

**Contraindications & Warning:**

Do not use in pregnancy.

**Side Effects:**

A few cases of gastrointestinal discomfort and headache have been reported.

**Pharmaceuticals Precautions:**

Store in a cool & dry place, away from light. keep out of reach of children.

**Commercial Pack:**
